Areas to Improve (For each member)	Implement allergy alerts visible during patient search; add emergency contact quick-dial links on patient cards.	Include doctor digital signature on issued prescriptions; expand department categorization for specialized clinics.	Add appointment check-in confirmation before pharmacy dispensary; support appointment status notifications via push alerts.	Add support for partial payments and insurance claims; automate nightly database backup verification scripts.	Consider combining lab test reagents with pharmacy stock tracking; add export of lab test statistics to Excel.
Comments	Great work on patient management. Dila provided clean patient entities that made prescription linking straightforward and error-free.	Excellent coordination in scrum meetings. Kavinda helped resolve blockers promptly and ensured doctor data integrated smoothly with prescriptions.	Great partner in system integration. Chanul built an efficient appointment scheduling workflow that aligned perfectly with clinical consultations.	Outstanding leadership. Kesaru integrated pharmacy item pricing directly into the billing engine and PayHere gateway without any discrepancies.	Diligent and dependable teammate. Nethuli completed all lab modules with thorough test cases and maintained great consistency throughout sprints.

Overall Team Evaluation

How well did your group function as a team overall? (Excellent / Good / Fair / Poor)

Evaluation: Excellent — The group functioned as a well-oiled team with prompt issue resolution, shared coding standards, and continuous integration testing. Everyone completed their allocated workload to a very high standard.

Additional Comments

If you have any additional comments regarding a specific member, you may include them in this section. (This is optional.)

The collective effort of all six members made the complex hospital workflow straightforward to integrate. Every developer was accessible, receptive to feedback, and contributed wholeheartedly.
