Areas to Improve (For each member)	Could add quick-search shortcuts for patient MRN lookup; support temporary guest patient registrations for emergencies.	Could support dynamic break times within doctor shift intervals; optimize doctor specialty filtering speed.	Add barcode scanning support for drug batches; enhance batch expiration alert dashboard notifications.	Could streamline backend error response formatting; consider adding recurring invoice generation for ongoing treatments.	Add quick-preset test result templates for common lab panels; support urgent priority flags for STAT lab requests.
Comments	Very supportive and collaborative. Dila ensured patient records provided all necessary demographic data for smooth appointment booking.	Excellent Scrum Master and teammate. We worked together daily to synchronize doctor rosters with appointment slots, preventing any schedule mismatch.	Solid implementation of pharmacy inventory. Delivered reliable stock management and coordinated well during cross-module test scenarios.	Incredible group leader. Kesaru provided continuous architectural support, set up the live server environment, and built the billing system seamlessly.	Very dedicated developer. Delivered pathology lab order tracking and result entry on time, maintaining strong consistency across database tables.

Overall Team Evaluation

How well did your group function as a team overall? (Excellent / Good / Fair / Poor)

Evaluation: Excellent — Outstanding teamwork and collaboration across all phases. The coordination between patient records, doctor schedules, and appointment bookings worked flawlessly without any friction or delays.

Additional Comments

If you have any additional comments regarding a specific member, you may include them in this section. (This is optional.)

Everyone contributed equally and supported each other during critical sprint integration deadlines. The team demonstrated high professional standards, transparent communication, and mutual trust.
