Areas to Improve (For each member)	Could add bulk CSV patient import functionality; consider incorporating biometric patient identification in future versions.	Could enhance recurring appointment booking UI; integrate calendar sync (e.g. Google Calendar) for doctor consultation schedules.	Expand automated low-stock email triggers to pharmacists; add supplier lead-time tracking in inventory.	Could document deployment architecture earlier in the sprint; implement multi-currency support for international patients.	Provide sample PDF export templates for lab results; explore integration with automated lab diagnostic instruments.
Comments	Exceptional contribution as Product Owner. Defined clear user stories, completed patient registration and triage early, and maintained great sprint velocity.	Collaborated closely with me on doctor-appointment slot integration. Handled concurrency locking brilliantly and was always prompt during standups.	Very hardworking and methodical. Pharmacy stock deduction and prescription fulfillment were built robustly without blocking sprint deadlines.	Superb leadership and technical guidance. Kesaru kept the entire team aligned, managed cloud infrastructure seamlessly, and delivered payment integration flawlessly.	Consistently dependable. Nethuli developed the lab test lifecycle with great precision and actively participated in all sprint retrospectives.

Overall Team Evaluation

How well did your group function as a team overall? (Excellent / Good / Fair / Poor)

Evaluation: Excellent — As Scrum Master, I observed exceptional discipline, attendance in daily standups, and accountability throughout all 4 sprints. The team resolved integration blockers promptly and delivered all milestones smoothly.

Additional Comments

If you have any additional comments regarding a specific member, you may include them in this section. (This is optional.)

The team operated with great synergy and shared responsibility. Every member delivered their designated module on time with complete CRUD functionality, design patterns, and rigorous database constraints.
